

FOR IMMEDIATE RELEASE

Lunar Pages Selects CoreLink Datacenters to Provide High Density Power and Cooling Strategies

CoreLink Partners with Lunar Pages to Enable the Provisioning of Webhosting Services to Customers.

June 18, 2009 (Las Vegas, NV) – [Corelink Data Centers LLC](#), a leading Tier 3 provider of colocation and disaster recovery solutions with facilities in Seattle, Las Vegas and Phoenix is pleased to announce that [Lunar Pages](#), a leading provider of affordable and reliable webhosting for personal websites, small business, ecommerce shops, Fortune 100 corporations and dedicated customers has selected CoreLink Datacenters, as their datacenter provider in Las Vegas. CoreLink is providing Lunar Pages with high density power and cooling facilities to support the mission-critical web hosting applications that are requiring more processing power to meet the demand of their end-users.

“We selected CoreLink Datacenters because of their high-level of expertise in the area of high density datacenter and disaster recovery solutions,” stated George Natzic, Chief Operating Officer of Lunar Pages. “Our ability to create and deliver secure, reliable and available solutions is the cornerstone of our offering. We sought a partner that has extensive experience and understands the importance of the volume and depth of services we provide for our clients.”

“Lunar provides a high level of service to their end-users, requiring power densities at a minimum of 200 wsf,” stated Geoff Hampson, CEO of CoreLink. “Working with Lunar Pages we developed a strategy to provide a solution that met Lunar Pages needs including modular scalability and flexibility to maximize efficiency. Their position as a premier provider of web hosting services is fully supported by CoreLink Datacenters with absolute security and guaranteed availability. We are excited to be working with Lunar Pages. This contract demonstrates our commitment to building relationships with our customers based on their needs today and into the future”

About Lunar Pages
